Abstract

© 2015 by the authors. The relevance of the studied problem is caused by the lack of the uniform model of a picture of the world of the professional and the insufficient number of the researches of a picture of the world of the pharmacists. The purpose of this article is the acquaintance of the psychologists working in the educational institutions and the pharmaceutical companies with the results of the research of a picture of the world of the students of the pharmaceutical faculty of medical school, which work in the specialty. The main result of this research is the empirical confirmation of the model of the picture of the world that includes the belief about the goodwill and justice of the world around, the one's own value and importance, the luck and ability to control the events of the life, about the future and about the efficiency of the professional activity. The materials of the article can be useful for the psychologists of the educational institutions in which there are pharmaceutical faculties, and also for the psychologists working in the pharmaceutical companies and pharmacy chains.
